Amendments to the Claims:

- (Previously Presented) A method for the vitrification of human oocytes, which comprises:
 - (a) placing human oocytes on a gold grid; and
- (b) placing the gold grid and the human oocytes directly into a slushed nitrogen (N₂ slush), wherein the human oocytes are directly exposed to the N₂ slush thereby undergoing vitrification, and wherein the human oocytes are able to live for a period of time after the human oocytes are devitrified.

2. (Cancelled)

 (Previously Presented) The method according to claim 1, wherein the step (a) further comprises treating the human oocytes with a cryoprotectant prior to vitrification.

4. (Cancelled)

- 5. (Previously Presented) A method for the vitrification and devitrification of human oocytes, which comprises:
 - (a) placing human oocytes on a gold grid;
- (b) placing the gold grid and the human oocytes directly into N_2 slush, wherein the human oocytes are directly exposed to the N_2 slush thereby undergoing vitrification, and wherein the human oocytes are able to live for a period of time after the human oocytes are devitrified; and
 - (c) devitrifying the human oocytes which have undergone vitrification.
- 6. (Previously Presented) A method for the vitrification and storage of human oocytes, which comprises:
 - (a) placing human oocytes on a gold grid;

Appln. No. 10/581,260 Response to O.A. dated 7/7/09 Page 3

- (b) placing the gold grid and the human oocytes directly into N_2 slush, wherein the human oocytes are directly exposed to the N_2 slush thereby undergoing vitrification, and wherein the human oocytes are able to live for a period of time after the human oocytes are devitrified;
- (c) transferring the human oocytes which have undergone vitrification into a storage container, the storage container containing a freezing material; and
- (d) storing the storage container containing the human oocytes which have undergone vitrification until the human oocytes are ready to devitrified.
 - 7. (Cancelled)
 - 8. (Cancelled)
